Information Communication Technology – Internship

As part of a structured ICT employment and development program, we are seeking

1. eRIC Project Internship - Chatswood
The Electronic Record for Intensive Care (eRIC) team is implementing a state-wide information system to provide increased ability to monitor and manage critically ill patients. The intern in this team will assist with BAU support and working with customer in the implementation of the service.

2. Cyber and Information Security Internship - Gladesville
This Intern will be working in a highly specialised Information and Cyber Security team – a part of the Enterprise Security Group. The role will include BAU security activities as well as providing operational support to the Information Security Management System (ISMS).

3. Project and Change Management Office (PCMO) Internship - Chatswood
The PCMO provides services which increases the likelihood of our programs being successful across eHealth. This intern will help capture project information from program teams in our portfolio management tool as well as developing and reviewing project reports.

4. Rural eHealth Training Internship - Chatswood
The intern will work with rural sites across NSW to assist them with business analysis, project support, training, implementation, change management, and benefits realisation activities for the implementation of health information technology systems. This position would be perfectly suited to someone studying Nursing, Health Informatics, and Learning & Development/Training.

5. Directory, Messaging and Collaboration Services Internship – Newcastle/ Parramatta
This function is responsible for the support and maintenance of state-wide systems utilising the following Microsoft based technologies Active Directory, Exchange, Skype for Business and SharePoint. NSW Health directory environment hosts 200,000 user accounts, 125,000 email users, 10,000 Skype for Business across the state of NSW.

6. Technical Services State-wide Network Internship - Parramatta
This intern will assist with BAU customer interactions and project support of the voice, video and data networking databases implemented and managed by the Technical Services team.

7. Infrastructure Office Internship - Chatswood
This function is primarily responsible for running projects that perform the design and implementation of major ICT infrastructure typically associated with state-wide scaled systems and services.

8. Cloud Services Internship - Parramatta
The intern will work with the Cloud Services team(s) in the delivery of ICT Infrastructure, supporting eHealth Programs and Services across NSW Health. This position would be suited to someone studying ICT Data Centre and/or Cloud Technologies and/or Infrastructure Automation.

9. ICT Strategy & Governance Internship - Chatswood
Working with a team of subject matter experts, the intern will get involved with a range of Human-Centred Design activities ranging from site visit-based contextual inquiry, user needs analysis, contextual analysis including affinity diagramming, conceptual design and evaluation and usability testing.
