Agency overview

The Department of Regional NSW was formed in 2020 as a central agency for regional issues. The Department is responsible for building resilient regional economies and communities, strengthening primary industries, managing the use of regional land, overseeing the state's mineral and mining resources and ensuring government investment in regional NSW is fair and delivers positive outcomes for local communities and businesses.

Public Works Advisory (PWA) is part of the Department of Regional NSW. PWA supports local and state government agencies to deliver critical infrastructure initiatives by providing expert advisory, planning, delivery and support services. We bridge the gap between the government and the private sector, helping clients to maximise value, optimise costs and manage risks in their infrastructure programs and the lifecycle management of their assets.

Primary purpose of the role

Manages the delivery of one or more assigned infrastructure projects ranging in medium to high in size and complexity, or contributes to the planning and delivery of infrastructure projects with medium-to high complexity.

As a team leader, the Project Manager directs other Project Managers on the delivery of programs of low to medium complexity and the application of best practice project management principles in order that time cost, quality, safety and environment targets and corporate and region expectations and requirements are met.

Key accountabilities

- Facilitate input from team members and other stakeholders and prepare project plans to manage the planning and delivery of assigned medium complexity infrastructure projects.
- Assign projects and engage with project team members to manage and lead the planning and delivery of minor infrastructure works programs.

- Deliver tasks assigned by other Project Managers to contribute to the planning and/or delivery of large, complex projects in the capacity as team member.
- Prepare small business proposals and participate as part of a bid team for significant proposals to contribute to business performance.
- Deliver tasks and projects that demonstrate a thorough understanding and application of best practice project management principles to achieve client satisfaction targets and provide excellent client service.
- Identify opportunities for process improvement and propose new approaches for consideration by the business unit manager to contribute to improved business performance.
- Identify opportunities for improvement as the project proceeds and arranging formal lessons learned forums at the conclusion of projects to contribute to continuous improvement.
- Identify the learning and development needs of self and team members, provide mentorship and facilitate appropriate action to contribute to the on-going professional excellence of the region and the continuous professional development of the team.

Key challenges

- Achieving client and business unit objectives given that strict time, cost and quality parameters apply when managing multiple projects and delivering project components.
- Identifying and managing project delivery risks, including safety and environment given that stakeholder's behaviour needs to be influenced to implement identified project risk strategies.
