PCAT Code	111 91 92
Date of Approval	20 December 2017 (Updated 6 April 2018 and February and October 2020)
Agency Website	www.dpi.nsw.gov.au

Agency overview

The Department of Regional NSW was formed in 2020 as a central agency for regional issues. The Department is responsible for building resilient regional economies and communities, strengthening primary industries, managing the use of regional land, overseeing the state's mineral and mining resources and ensuring government investment in regional NSW is fair and delivers positive outcomes for local communities and businesses.

The NSW Department of Primary Industries (NSW DPI) supports the development of profitable primary industries that create a more prosperous NSW and contributes to a better environment through the sustainable use of natural resources.

DPI Fisheries, a Branch of NSW DPI, is responsible for administration of the *Fisheries Management Act 1994* and the *Marine Estate Management Act 2014*. The primary objective of the Fisheries branch is to deliver on expectations relating to both economic growth and careful stewardship of our aquatic resources. The Branch leads NSW fisheries and aquaculture industry management, development and conservation through research, policy and regulatory compliance to foster sustainable and economically viable commercial, recreational and aboriginal fishing and aquaculture sectors. The Branch manages the protection of key fish habitats and marine biodiversity, threatened species, oversees fish stock conservation.

Primary purpose of the role

The Fisheries Technical Coordinator provides supervision and direction of a fisheries technically-based work unit, for approved research projects within the Fisheries Research Branch.

Key accountabilities

- Plan, schedule and supervise activities of a technical nature relating to a Fisheries technically-based work unit including identifying and managing Work Health and Safety (WHS) risks.

- Manage all equipment relating to the technical based work unit including establishing/updating relevant policies and procedures in relation to use of equipment and keeping maintenance records.
- Evaluate and monitor the use of all work areas in the unit to ensure they meet WHS requirements including conducting site inductions for new staff.
- Manage and provide training to staff within the technical based work unit and ensure staff certification/licence requirements are kept current.
- Coordinate the acquisition of new assets required for the technical based work unit.
- Assist scientists/managers, where required, with drafting briefs, manuscripts, brochures including analysis and representation of data in documents.
- Design and implement small scale experiments that could enhance the function of the technical based work unit.
- Liaise with stakeholders/industry to help develop technical aspects of new projects within the technical base work unit and communicate findings to scientists/managers.

Key challenges

- Maintaining skill set and keeping up to date with new techniques relating to their technical based work unit.
- Ensuring staff and activities within the technical based work unit comply with relevant Departmental, State and National legislation, standards, policies, procedures and QA/QC practices.
- Management of an intensive, variable work program that may variously require operations out of hours, in a variety of hydrological and climatic conditions and/or in remote land/offshore areas.

Key relationships

Who	Why
Internal	
Scientist/Manager	<ul style="list-style-type: none"> • Undertakes work according to direction of supervising Scientist/Manager, escalate issues and provide technical advice • Participate in scientists/manager team meetings
Technical staff work team	<ul style="list-style-type: none"> • Supervise and provide direction for technical staff • Create work plans for team members and manage performance • Lead technical meetings
