Agency overview

The Department of Regional NSW was formed in 2020 as a central agency for regional issues. The Department is responsible for building resilient regional economies and communities, strengthening primary industries, managing the use of regional land, overseeing the state's mineral and mining resources and ensuring government investment in regional NSW is fair and delivers positive outcomes for local communities and businesses.

The NSW Department of Primary Industries (NSW DPI) supports the development of profitable primary industries that create a more prosperous NSW and contributes to a better environment through the sustainable use of natural resources.

Within NSW DPI, the Biosecurity & Food Safety Division is responsible for effective management and risk minimisation of biosecurity threats to NSW as well as the through-chain regulation of food safety. It delivers a risk based approach to policy and compliance, and provides regional engagement and coordination in response to emergency incidents and natural disasters impacting primary industries and the food sector.

Primary purpose of the role

Lead and manage animal biosecurity projects to develop and implement contemporary evidence-based animal biosecurity and public health (including zoonosis) policy and advice. The role liaises extensively with other branches within DPI, Local Land Services and with stakeholders in other state government agencies and industry.

Key accountabilities

- Lead and manage the delivery of animal biosecurity and public health (including zoonosis) projects to deliver against the NSW DPI strategic plan and Animal Biosecurity, Welfare and LLS joint business plan
- Provide veterinary and technical analysis and advice, liaising with industry, research, government, and university stakeholders to identify emerging issues and recommend solutions to resolve problems and mitigate risks
- Prepare high level briefings, papers, submissions, Ministerial and other correspondence, speeches and reports
- Represent the Department in state and national policy forums to advise on veterinary, technical and strategic policy issues and obtain feedback
- Maintain awareness of animal biosecurity and related issues across the state and nationally as well as advances in academic and veterinary thinking on biosecurity
- Deliver within the project management framework, robust comprehensive reports and documents, that withstand expert external scrutiny for all recommended policies and proposed intervention measures
- Maintain links with key partners such as Local Land Services, industry stakeholders, academic institutions and other jurisdictions to ensure DPI policy is continuously improving.
- Support the Group Director and Team Leader in planning, preparedness and operational responses to animal biosecurity emergencies, liaising with industry and other government organisations to deliver a coordinated, effective response during a biosecurity emergency event, including taking part in duty on-call rotation

Key challenges

- Provision of accurate timely veterinary and technical advice and policy recommendations on a range of complex issues given the need to understand the problem and formulate responses within short-time frames, often without prior notice
- Following rigorous project management and policy development, managing multiple policy issues, implementing and reviewing systems and methodologies
