PCAT Code	1229192
Date of Approval	November 2019
Agency Website	<a href="http://www.transport.nsw.gov.au">www.transport.nsw.gov.au</a>

### Agency overview

At Transport, we're passionate about making NSW a better place to live, work and visit. Our vision is to give everyone the freedom to choose how and when they get around, no matter where they live. Right now, we're delivering a \$51.2bn program – the largest Australia has ever seen – to keep people and goods moving, connect communities and shape the future of our cities, centres and regions. At Transport, we're also committed to creating a diverse, inclusive and flexible workforce, which reflects the community and the customers we serve.

Our organisation – Transport for NSW – is comprised of nine integrated divisions that focus on achieving community outcomes for the greater good and on putting our customers at the centre and our people at the heart of everything we do.

### Primary purpose of the role

The Traffic Systems Supervisor is responsible for the planning of work on intelligent traffic systems, tunnel power and life safety equipment, including allocating and coordinating resources, developing team capabilities and monitoring team performance, to meet business objectives and contractual and statutory requirements.

The role will also manage minor projects and contribute significantly to the estimating/bidding process.

### Key accountabilities

- Manage team and individual performance to meet the pre-agreed time, cost and quality targets, specifications and project requirements by supervising staff, ensuring effective and safe processes, coordinating resources and ensuring an appropriate skills mix by identifying skills gaps and providing guidance and training.
- Manage the risks of assigned intelligent traffic systems and tunnel power and life safety equipment maintenance and minor project work by coordinating the collection and reporting of ITS

equipment/material and working with the works teams to identify issues, develop solutions and to set and meet the time, cost and quality goals.

- Manage community and client relations and facilitate the efficient delivery of works through communication, liaison, negotiation and coordination with clients, local government, utility authorities and other government agencies.
- Manage the technical aspects of tunnel life safety systems and ITS systems using advanced electrical and electronic technologies, such as traffic control signals, variable message signs, changeable message signs, emergency telephones, tidal flow systems, traffic monitoring units by providing expert advice.
- Ensure contract specification, statutory and RMS policy compliance through the implementation of appropriate monitoring and auditing systems and addressing identified non-conformances with the works teams.
- Manage project administration by maintaining records of work performed, verifying expenditure, preparing competitive estimates including recommendations on resourcing, productivity, work methods and associated costs and carrying out billing for minor projects/parts of projects.
- Ensure the implementation of workplace change by facilitating continuous improvement initiatives and the regular review of staff management, quality, WHS and environmental management systems and procedures.
- Prepare job-specific work proposals for assigned traffic system projects by planning technical specification for minor projects and monitoring and reporting on work processes, safety procedures and daily site activities.

## Key challenges

- Leveraging information and input from various sources to develop flexible and workable solutions to meet Agency customer expectations.
- Working with a range of internal and external stakeholders and suppliers to support and facilitate the effective delivery of works and projects deadlines and milestones to the required standards and targets within budget.
- Building effective working relationships with contractors, other agencies and stakeholders to ensure efficient and effective outcomes, given their varying expectations, viewpoints and interests.

## Key relationships

Who	Why
<b>Internal</b>

External stakeholders, including Public and community	<ul style="list-style-type: none"> <li>• Collaborate and build effective relationship, respond to queries</li> </ul>
Contractors and suppliers	<ul style="list-style-type: none"> <li>• Facilitate closer working relationships with consultants, contractors and other industry partners to deliver cost-effective services, solutions and meet government requirements.</li> <li>• Keep abreast of the latest trends in the industry</li> </ul>

## Role dimensions

### Decision making

The role has some autonomy determining and setting work priorities with approved projects. The role will take ownership of assigned work and issues as they arise, and proactively suggest new strategies and processes for improving performance or address issues.

The role will provide technical expert advice and work collaboratively with internal and external stakeholders, and consult on and enlisting commitment to the effective delivery of specific works and project strategies.

The role will defer to the Manager on complex matters or issues that require a higher level of resolution or delegation for resolution.

### Reporting line

The role is accountable and reports to the Project Engineer, Works Manager or the Traffic Facilities Manager, reporting lines vary depending on the region/location of the role

### Direct reports

The role will have a variable number of direct and indirect reports

- Traffic Signal Technicians and Wages staff

### Budget/Expenditure

Nil

## Essential requirements

- Relevant trade qualifications and possess a qualified Supervisor's (Electrical) Certificate or a qualified Electrical Contractor's licence.

- Demonstrated experience in the areas of minor construction, maintenance and modification of traffic system and tunnel life safety system works with an understanding of the commercial aspects of the business.
- Proven ability to effectively manage and motivate direct control resources in a team environment through the development of a cooperative and participative workgroup to achieve the efficient delivery of project and business objectives.
- Demonstrated ability to effectively manage the planning and delivery of traffic systems projects to achieve time, cost, quality, safety and environmental objectives using direct control and contract resources.
- Demonstrated experience in interpreting plans and specifications for project works, estimating costs, duration and resources required for project activities and subsequently control costs and monitoring expenditure.
- Sound knowledge of and experience in implementing WHS management systems, including the development and review of Safe Working Method Statements.
- Proven ability to use specialised Information Technology software and hardware in the delivery of project and maintenance works.
- Possess and maintain a current motor vehicle driver licence and be willing to work outside regular working hours.
