

Role Description

Development Operations (DevOps) Engineer

Customer
Service

Cluster	Customer Service
Agency	Department of Customer Service
Division/Branch/Unit	Various
Classification/Grade/Band	Clerk Grade 7/8
ANZSCO Code	261313
PCAT Code	1336468
Date of Approval	February 2020

Primary purpose of the role

Manage the implementation of automated software components, system changes and maintain/monitor the scheduling process ensuring service level agreements are delivered on time to expected standards.

Key accountabilities

- Manage the Development Operations and change request process to minimise the risk of service interruptions, identifying opportunities for service and business improvements
- Design, create, test and document new or amended software applying best practice methodologies and industry recognised systems, processes and standards to meet defined business needs
- Identify, analyse, prioritise and implement improvements and efficiencies to maximum value from services, including the potential for automation of processes
- Develop, review and maintain support documentation for the change management process to minimise the impact of planned changes
- Integrate and test components, systems and their interfaces to create operational services, maintaining and monitoring tools to ensure software is configured and working efficiently and to agreed security standards
- Manage batch processes and follow up batch errors to ensure all jobs are completed successfully and batch jobs are run at optimum efficiency
- Work with business and technology stakeholders to translate user stories and business problems to propose design approaches or services to create specifications and technical designs of systems to meet defined business needs
- Develop and maintain customer and stakeholders through effective communication, negotiation and issues management to ensure deliverables are met

Key challenges

- Building relationships with business representatives and contractors to meet client requests and requirements with competing interests, schedules and projects

- Understanding and explaining how system changes affect and impact on the ability to conduct business as usual while balancing user needs with user desires
- Keeping up to date with best practice industry standards in a high volume work environment with tight deadlines

Capabilities for the role

The [NSW public sector capability framework](#) describes the capabilities (knowledge, skills and abilities) needed to perform a role. There are four main groups of capabilities: personal attributes, relationships, results and business enablers, with a fifth people management group of capabilities for roles with managerial responsibilities. These groups, combined with capabilities drawn from occupation-specific capability sets where relevant, work together to provide an understanding of the capabilities needed for the role.

The capabilities are separated into **focus capabilities** and **complementary capabilities**.

Focus capabilities

Focus capabilities are the capabilities considered the most important for effective performance of the role. These capabilities will be assessed at recruitment.

The focus capabilities for this role are shown below with a brief explanation of what each capability covers and the indicators describing the types of behaviours expected at each level.
